To Whom It may Concern:

I have been working with AI and Packaging Solutions for over 10 years. I find them responsive, professional and courteous which along with their unique talents in printing higher-end, more complicated labels becomes a winning combination. They have bent over backwards to meet timelines or to problem-solve print jobs that many in Colorado could not pull off. They are small enough to give the 4 companies of mine they have done jobs for the attention they need while being big enough to handle large volume efforts with ease. I highly recommend them!
